

WHO MANAGES MENTAL HEALTH SERVICES?

Since we released [The Seclusion Report](#), we've had some enquiries about who manages different mental health services. We produced this flyer as a result.

Sometimes mental health services are managed (i.e., with executive and board oversight for delivery) by the hospital where they are located, but sometimes a *different* health service is responsible for management.

What's a designated mental health service?

A designated mental health service is a health service that may provide compulsory assessment and treatment to people in accordance with the *Mental Health Act 2014*.
